SMALL AND FLEXIBLE RADIO TRANSMITTER THAT CAN BE CUSTOMIZED TO YOUR NEEDS

CanCom family are modules and radio transmitters for smart control of mobile hydraulics. Now we are launching the next generation CanCom including a new rugged handheld transmitter with 8 pushbuttons. This is ideal for harsh environments with its IP65 rating.

The transmitter is powered by 3 x AAA rechargeable batteries and when the batteries are low the transmitter warns by LED. The transmitter is locked to the receiver with a Common Code for the safe use.

The flexible software enables the transmitter is suitable for simple applications, such as for checking applications with multiple functions. It is easy to program functions via free software CanPro.

Along with Jorgensen's CanCom multi-module 30, you get a very cost effective solution. You can program the analog or digital inputs and digital or PWM outputs. The control system is robust and specially designed to withstand demanding operating conditions.
